TEAM F - WAVE 1 FINAL REPORT

Hauwa desk | Oct 14, 2026 | Evidence anchor 175ee9e | Ruling receipt 4b40e83

OPERATING CONTRACT (COMPLIANCE STATEMENT)

Read-only throughout. Protected state untouched. No claim without an executed check. Failures and unknowns declared. No duplicate assignments. No invented numbers.

VERDICT

Wave 1 read-only recon COMPLETE IN SUBSTANCE. All five team assignments landed, adjudicated, and reproduced where required. Conditional acceptance stands. Zero repairs executed, zero merges, frozen packs intact. Owner ruling: Wave-1 recon CONDITIONALLY ACCEPTED; FINAL SYSTEM ACCEPTANCE WITHHELD.

TEAM STATUS

TEAM A (visual closure): landed 2a2c6bd; owner ruling conditional acceptance (9a36de0); reproduced from two seats (500f57c, 403ece9). Immigration 5-class zeros reproduced; 3 honest offline notices confirmed.

TEAM B (six-law matrix): landed per receipt 189; raw file pending handoff; NIS and NCDC honest NOT-TESTED.

TEAM C (package integrity): landed from both seats. All five artifact hashes byte-identical to published claims (immigration 981c8260, cbn-live f63dc323, nimc 9c71cf92, cac 7b31d166, health 63750cdf).

TEAM D (internetless): landed and adjudicated. 5,000/5,000 binding; identical miss-case across three environments; airplane mode device-only on both seats.

TEAM E (corpus integrity): landed aec1425. Live seal HOLDS exactly at 1,341,437; quarantine 12,722 recorded-not-inspectable, absent from index (measured).

CONSOLIDATED BLOCKERS (TF-1 TO TF-10)

TF-1: Provenance stamp 20,000-char truncation: health 19,999/19,999, immigration 19,984/20,000. Root cause agreed both seats. Re-stamp awaits ruling. Remediation PLANNING APPROVED, EXECUTION NOT AUTHORIZED.

TF-2: Offline styling-loss class: immigration 232 external stylesheet links, health 60/61; linked CSS absent from packs. Pipeline measured what it failed to embed. PLANNING APPROVED, NOT AUTHORIZED.

TF-3: health-v2 rendering-path external fonts: 54 @font-face srcs, all to moh.dotmac.ng (vf-embed step half-done); 15 of 32 Poppins keys offline-broken. Receipt 186 FAIL stands. Decisive offline-render experiment named, blocked on 38MB serve path. SETTLED at all seats.

TF-4: Template-literal capture class: immigration stamp resource URL (verified) + SMEDAN D-5 (desk seat, class corroborated). SMEDAN gets its own evidence and regression case per ruling. PLANNING APPROVED.

TF-5: CAC pack is a bot-challenge shell (dom 6,145 bytes; live /cac serves older v0.1). Separate capture required; challenge shell preserved.

TF-6: CBN pinned-state comparison OPEN: offline pack absent from both verification seats; committed capture f63dc323 verified clean. Blocked pending artifact handoff.

TF-7: Canonical-corpus ruling (D-3) OPEN: master NOT swapped (gov.ng 659 docs, NIMC 4 fts hits) but foreign content present. 5,000-kit vs 932-wave vs kb5k decision reserved to owner. No seat claims it.

TF-8: Quarantine disposition = owner ruling; quarantine in force; no release, delete, rewrite, or silent reclassification. Package must separate body integrity, source identity, historical identity, eligibility.

TF-9: Unexplained counter deltas: band2_docs +1,800 over range; fts rows -1,086 under band-sum. To be reconciled against authoritative ledgers before classification.

TF-10: Marker vocabulary NAMED per object (harz-provenance: vs HARZ VISUAL PRESERVATION) - standing policy before Wave 2; no retroactive change to existing evidence meaning.

SCANNER LAW (WAVE-2 STANDING POLICY)

Two-seat agreement counts as independent confirmation only when tokenization assumptions differ. Wave 1 caught three shared blind spots: href regex boundary, comment-window scan, quote-form regex. Both seats retracted their own wrong numbers against pinned evidence - the object-naming discipline worked.

FIVE OWNER DECISIONS (ISOLATED)

A Canonical corpus: OPEN. No population replacement, deletion, or reclassification until D-3 package is presented

with governing definition, affected population, evidence, proposed consequences.

B Quarantine disposition: OPEN; quarantine remains in force.

C Provenance repair: PLANNING APPROVED; EXECUTION NOT AUTHORIZED. New candidate artifacts only, never in-place rewrites; malformed or truncated output rejected.

D Offline dependency repair: PLANNING APPROVED; EXECUTION NOT AUTHORIZED. Complete dependency inventories (stylesheets, nested CSS imports, fonts, dynamic resources). Acceptance target: verified offline behavior with honest disclosure.

E Capture-pipeline correction: PLANNING APPROVED; EXECUTION NOT AUTHORIZED. Regression-tested genuine-URL vs JS-expression distinction; SMEDAN D-5 own case.

REQUIRED HANDOFFS BEFORE FINAL CLOSURE

1. Team B raw six-law matrix report + authoritative D-0..D-6 definitions.
2. CBN offline pack + identity metadata for pinned-state reproduction.
3. Authorized serving path for health-v2 (38MB) before live deployment verification.
4. Desk A remaining reports with immutable evidence references.
5. D-3 authoritative definition + proposed ruling.
6. Quarantine eligibility and identity evidence.

BILLION-MISSION BOUNDARY (SEPARATE RECEIPT)

12,689,085,940 attested documents (OSM 12,176,664,178 + OpenAlex 326,886,422 + Wikimedia 132,842,383 + IA texts 52,692,957), sha-sealed manifest 334777ad, live on the worker stats. Recorded as a separately receipted mission claim, NOT part of Wave-1 package or corpus acceptance. It does not establish uniqueness, provenance, body identity, or canonical membership. Any future claim names its counting unit, dedup rule, attestation criteria, and exact evidence anchor.

BINDING EXECUTION BOUNDARIES

No repair of frozen artifacts. No merge or deployment change. No quarantine release. No canonical-corpus replacement. No acceptance inferred from a mission-level count. Every remediation candidate receives a new identity, independent verification, and a separate acceptance ruling.

Delivery note: platform upload allowance exhausted at assembly time; this PDF is delivered via the public harz-git repository (verified public read). The full consolidated ledger (WAVE1-CONSOLIDATED-BLOCKER-LEDGER.md) is the authoritative evidence record; this PDF is its executive rendering. Generated 2026-10-14 08:12 UTC on the Hauwa seat.
