We are seeking a long-term supply relationship and are prepared to grow volumes with your demand.

4. Origin, warehouse and logistics

Primary origin: Plateau State, Yelwan Shendam producing belt, with field supply partners Mr Samaila Garba and Mr Awwal Adamu. Aggregation: partner-operated collection in Yelwan Shendam, Shendam LGA. Transport:

road on the Plateau–Abuja corridor, trucking arranged per agreed volume, delivery documentation and weighbridge slips with each consignment. Destinations: Abuja (primary); Kano and Sagamu/Ikenne by arrangement.

5. Quality and compliance

Commodities cleaned, dried to agreed moisture, sorted and bagged to agreed weights. Pre-delivery sampling and joint inspection before dispatch; rejected sub-lots stay with us. Every bag traceable to its aggregation batch.

6. Prior supply experience

This would be our first agricultural supply engagement at this scale. We say so plainly, and we offer our Plateau production partners and our company records as references on request. What we lack in volume history we make up in traceability: every consignment is documented, weighed and receipted.
